EYETABLET 10 V3

... a unique and simple CHART PANEL to meet all professional needs in vision testing !

High Technology, User-Friendly Touchscreen Interface

TWO APPLICATIONS IN ONE DEVICE

OPERATION PANEL

Another remote control to have a possibility to manage your VistaVision

NEAR VISION TESTING

to check the near vision with three test programs (Reading, Measurement, Quality of Vision)

Change the way you work: the OPERATION PANEL provides a perfect control of your far VistaVision device!

- The professional way to interact to your VistaVision LCD chart system
- Direct control on all parameters of a test
- You can show a test to the patient without look directly to the chart panel
- This networking technology allows you to use multiple chart panels in the same examination room
- Simple and intuitive
- Fast built-on and instant-off (Android 4.2 Operating System)
- Complete, precise and versatile software; programmable patient's vision examination
- Free software update with micro SD Card (optional, but recommended) forever
- Long-life, up to date technology and strong competitive price !

A new way you can work: <u>NEAR VISION TESTING</u> with accurate and easier tests!

- Application to check the near vision (40cm)

- Examinations programs:
